

SEXUAL AND REPRODUCTIVE HEALTH AND RIGHTS

INFOGRAPHIC SNAPSHOT

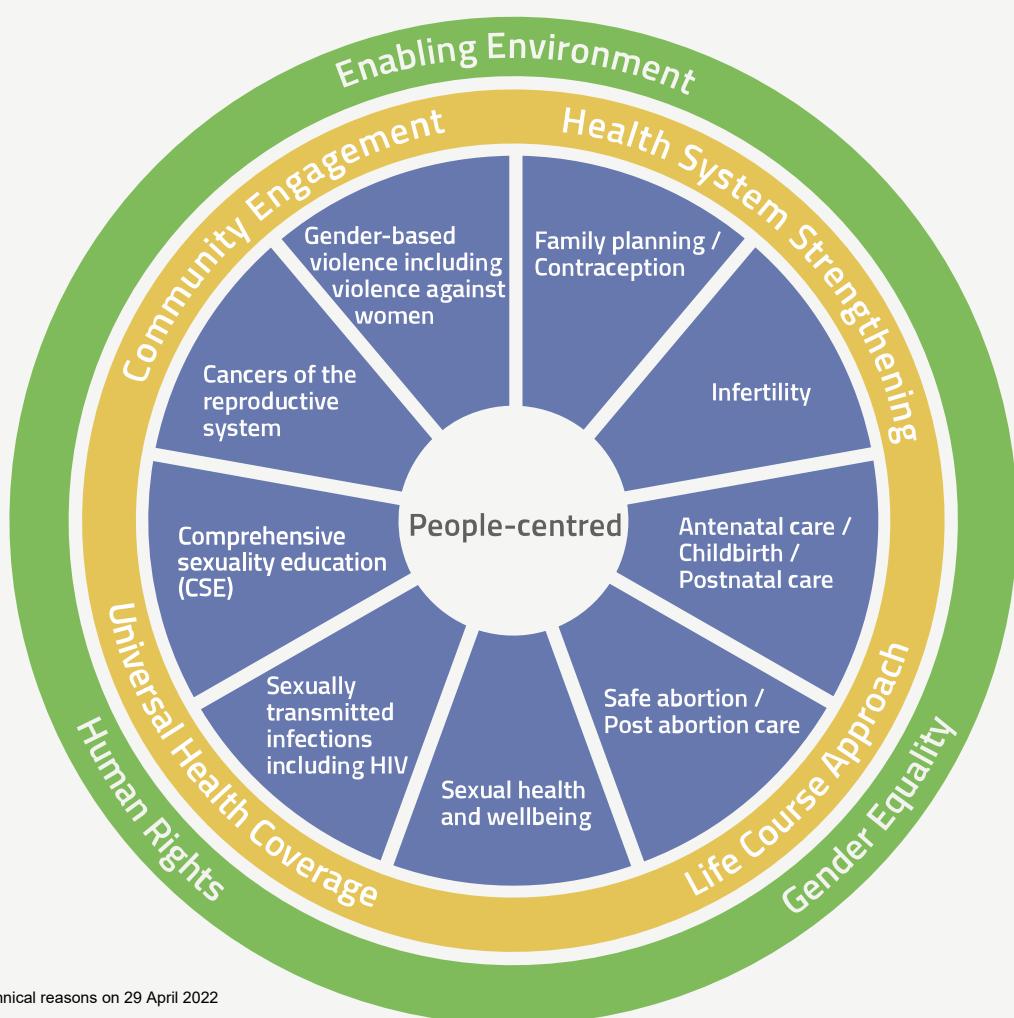

ZIMBABWE 2021¹*

This country snapshot provides an overview of national data relating to sexual and reproductive health and rights (SRHR) throughout the life course. Realization of SRHR² requires provision of comprehensive, people-centred services, that address the different elements of SRHR, and which are supported by an enabling environment, quality health systems, and meaningful community engagement. Multiple, synergistic cross-linkages exist within and between the different SRHR elements, leading to sequential outcome benefits throughout the life course.³

By highlighting the national SRHR situation – including successes, areas for improvement, and data gaps – this snapshot can be used for determining priorities, planning of programmes, resource mobilization, and strengthening of health systems, service delivery and community engagement.

This snapshot uses the latest data publically available at the publication date¹, from reputable international sources (see endnotes for the year and source of each data point). It is acknowledged that intersectionality and people-centredness are not well reflected in available data, and that many categories of information currently collected are gender-binary.

*Reissued for technical reasons on 29 April 2022

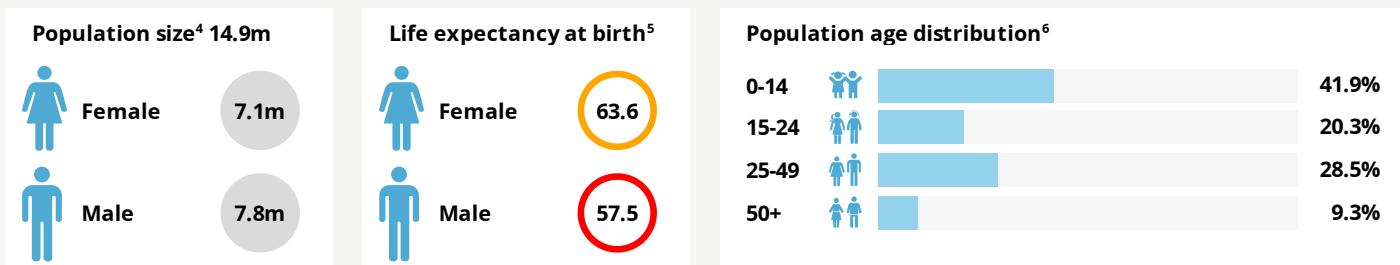

CONTEXT

The Sustainable Development Goals (SDGs) and Universal Health Coverage (UHC) agendas provide important opportunities to realise sexual and reproductive health and rights for all, including key and vulnerable populations, and to reimagine and enhance equitable access and quality coverage of SRH services. Delivery of comprehensive SRHR interventions throughout the life course is an essential component of UHC.

Global Targets: Achieved  Challenges remain  Major challenges remain 

Demographic data

Sexual and Reproductive Health

HIV

	 Number of new HIV infections ¹⁴	 Number of people living with HIV ¹⁵	 Number of AIDS related deaths ¹⁶
 Child (0-14)	5,200	84,000	3,000
 Female (15-24)	9,200	87,000	1,200
 Male (15-24)	4,200	49,000	1,100
 Female (25-49)	9,600	540,000	5,600
 Male (25-49)	9,900	350,000	5,100
 Female (50+)	<1,000	140,000	2,000
 Male (50+)	<1,000	120,000	2,100
Total	40,000	1.4m	20,000

ENABLING ENVIRONMENT

Supportive laws and policies, and access to justice are essential to eliminate stigma, discrimination, violence, coercion and exclusion in health care. Such laws and policies create a safe and supportive enabling environment that meets the SRHR needs of all people, especially key and vulnerable populations. Harmful laws need to be amended, and damaging practices need to be countered at all levels.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain 

Laws and policies

People living with HIV

Are there laws or policies that:

Criminalize transmission, exposure or non-disclosure of HIV ¹⁹	Yes 
Restrict entry, stay and residence of people living with HIV ²⁰	No 
Protect against discrimination on basis of HIV status ²¹	No 
Allow HIV self-testing ²²	Yes 
Make oral pre-exposure prophylaxis for HIV (PrEP) available ²³	Yes 

Key populations

Are there laws or policies that:

Criminalize same-sex sexual behaviour ²⁴	Yes 
Criminalize sex work ²⁵	Yes 
Allow the death penalty for people convicted of drug-related offences ²⁶	No 
Support a harm reduction approach for people who use drugs ²⁷	No 
Legally recognize a third gender ²⁸	ND 

SRHR and gender-based violence

Are there laws or policies that:

Allow safe abortion ²⁹	Yes 
- To save a woman's life	Yes 
- To preserve a woman's physical health	Yes 
- To preserve a woman's mental health	No 
- In case of rape	Yes 
- In case of incest	Yes 
- Owing to foetal impairment	Yes 
- For economic or social reasons	No 
- On request	No 
Require spousal consent for married women to access SRH services ³⁰	No 
Explicitly criminalize marital rape ³¹	No 
Criminalize domestic violence ³²	Yes 
Criminalize sexual harassment ³³	Yes 
Require provision of CSE in primary school ³⁴	Yes 
 National strategy or policy on self-care interventions ³⁵	ND 

Extent to which laws and regulations guarantee access to SRH care and education (SDG 5.6.2)³⁶

Maternity care	ND 
Family planning	ND 
CSE	ND 
Sexual health	ND 
Total	ND 

Age of Consent

Legal age for consent to sexual intercourse³⁷

 Female	ND 
 Male	ND 

Legal age for marriage without parental consent³⁸

 Female	18 
 Male	18 

Laws requiring parental consent for adolescents to access SRH services³⁹

Yes <16yrs

Women's empowerment

Percentage of women that believe they should have final say in decisions regarding their own healthcare⁴⁰

Percentage of general population reporting discriminatory attitudes towards people living with HIV⁴³

26.0%

HEALTH SYSTEMS

Universal health coverage (UHC) is central to achieving better health and well-being for all people throughout the life course. Reaching UHC requires transforming health systems away from vertical and top-down approaches towards integrated, people-centred, supportive systems for health. Comprehensive SRHR, within UHC, is crucial to support progress towards advancing health and wellbeing for all.

Integrated service delivery

Health facilities delivering HIV counselling and testing with SRH services⁵⁷

All

Some

None

Health facilities delivering HIV treatment and care with SRH services⁵⁸

All

Some

None

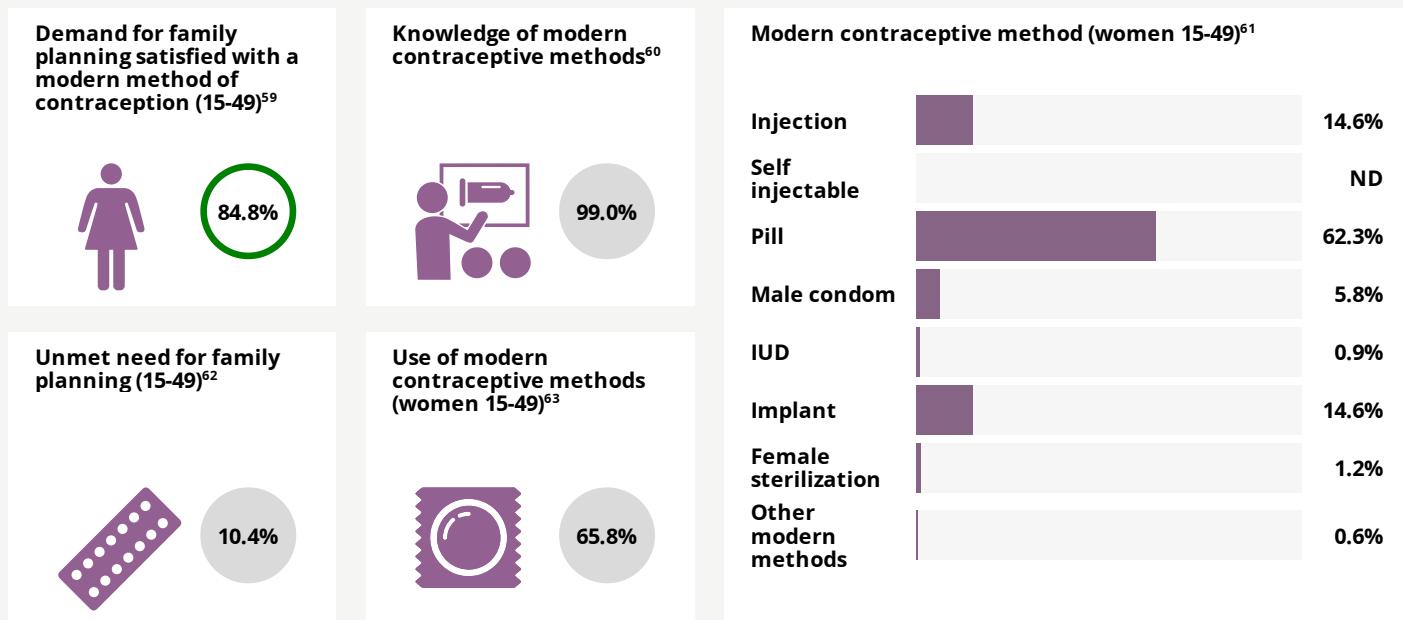

SERVICE DELIVERY: REPRODUCTIVE HEALTH

Women have the right to decide whether, when and how many children they want to have, and to do so safely, without fear of acquiring STIs including HIV, or of maternal morbidity and mortality. Women require access to a choice of modern contraceptive methods and quality antenatal, childbirth and postnatal care, safe abortion care (to the full extent of the law), post abortion care and infertility services.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain 

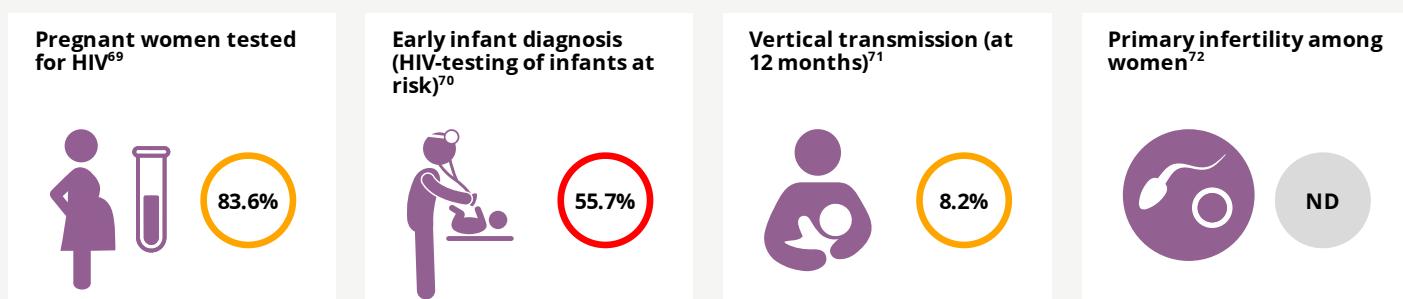

Contraception / Family Planning

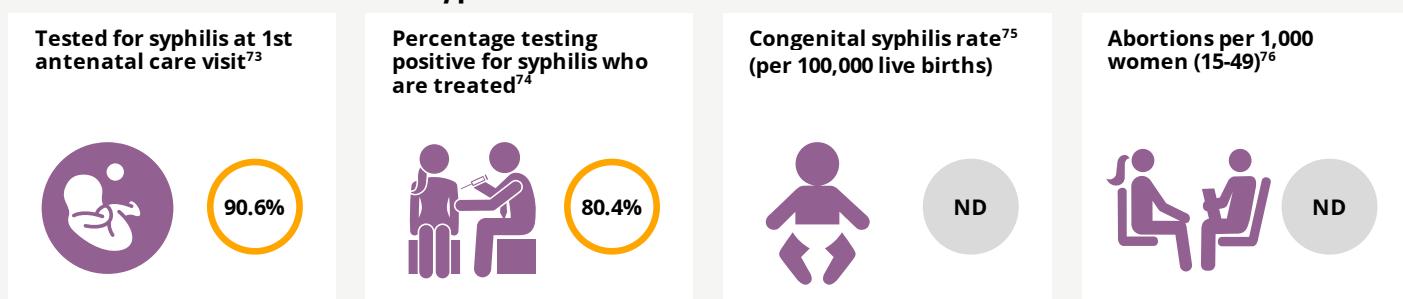

Antenatal, delivery and postnatal care

Vertical transmission of HIV

Vertical transmission of syphilis

SERVICE DELIVERY: SEXUAL HEALTH

Sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality. It requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, stigma, discrimination and violence.

ND = No Data

Global Targets: Achieved  Challenges remain  Major challenges remain 

HIV prevention

Condom use at last high risk sex (15-49)⁷⁷

Male circumcision⁷⁸

PrEP and HIV self-testing

Current oral pre-exposure prophylaxis for HIV (PrEP) users⁸²

HIV self tests conducted⁸³

Gender based violence

Women experiencing physical or sexual violence in past 12 months (15-49)⁸⁶

Wife agrees husband justified beating her - at least one reason specified⁸⁷

Syphilis

Active syphilis among men who have sex with men⁸⁴

Active syphilis among sex workers⁸⁵

Cervical cancer

Existence of national HPV vaccination programme⁹²

Existence of national cervical cancer screening programme⁹³

Type of programme⁹⁴

None

Coverage of national screening programme⁹⁵

SERVICE DELIVERY: SEXUAL AND REPRODUCTIVE HEALTH FOR ALL

Everyone has the right to access sexual and reproductive health services and information, free of force or coercion, and irrespective of age, sex, sexual orientation, gender identity, ability, socio-economic or occupational status.

ENDNOTES

1. The cutoff for data included in this Infographic Snapshot is 15/04/2021. The year provided for each endnote is the date of the latest available data with an earliest date of 2011. Where data is not available in an international data source 'No data' is stated. This does not mean that no data exists for this indicator but that no data was found in internationally validated data sources.

Indicator: Service delivery points provide care/support for women/men who have been raped/experienced incest: Post-exposure prophylaxis for sexually transmitted infections and HIV (within 72 hours of sexual assault) - according to national authorities. Source: UNAIDS Laws and Policies Analytics - <http://lawsandpolicies.unaids.org/>

92. 2019. Indicator: Existence of national HPV vaccination programme. Source: WHO Global Health Observatory - <http://apps.who.int/gho/data/view.main.24766>

93. 2019. Indicator: Existence of national screening programme for cervical cancer. Source: WHO Global Health Observatory - <http://apps.who.int/gho/data/view.main.24766>

94. 2019. Indicator: Type of national cervical cancer screening programme. Source: WHO Global Health Observatory - <http://apps.who.int/gho/data/view.main.24766>

95. 2019. Indicator: Coverage of national cervical cancer screening programme. Source: WHO Global Health Observatory - <http://apps.who.int/gho/data/view.main.24766>

96. 2019. Indicator: Child marriage (%), married by 18. Source: UNICEF - <https://unstats.un.org/sdgs/indicators/database>

97. No Data. Indicator: Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting (FMG/C). Source: UNICEF - <https://unstats.un.org/sdgs/indicators/database>

98. 2019. Indicator: Percentage of primary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - <http://lawsandpolicies.unaids.org/>

99. 2019. Indicator: Percentage of secondary schools that have fully implemented education policies on life skills-based HIV and sexuality education. Source: UNAIDS Laws and Policies Analytics - <http://lawsandpolicies.unaids.org/>

100. 2015. Indicator: Percentage of adolescents (aged 15-19) who reported having sexual intercourse with more than one partner in the last 12 months and who reported the use of a condom during their last sexual intercourse. Source: Demographic and Health Survey 2015. Compiled by UNICEF - <https://data.unicef.org/topic/hiv-aids/adolescents-young-people/>

101. 2015. Indicator: Percent of young people (15-24) with comprehensive, correct knowledge of HIV. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

102. It is recognised that there are also a number of vulnerable populations at greater risk of poor HIV or SRH outcomes such as migrants/refugees, indigenous populations, people with disabilities, people experiencing homelessness etc. These are not included in this snapshot due to a lack of data.

103. 2019. Indicator: Men who have sex with men population size estimate. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

104. 2019. Indicator: Percentage of men who have sex with men who are living with HIV. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

105. 2019. Indicator: Percentage of men who have sex with men who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

106. 2019. Indicator: Percentage of men reporting the use of a condom the last time they had anal sex with a male partner. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

107. 2016. Indicator: Sex workers population size estimate. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

108. 2019. Indicator: Percentage of sex workers who are living with HIV. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

109. 2019. Indicator: Percentage of sex workers who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

110. 2019. Indicator: Percentage of female and male sex workers reporting the use of a condom with their most recent client. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

111. No Data. Indicator: People who inject drugs population size estimate. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

112. No Data. Indicator: Percentage of people who inject drugs who are living with HIV. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

113. No Data. Indicator: Percentage of people who inject drugs who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

114. No Data. Indicator: Percentage of people who inject drugs reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

115. No Data. Indicator: Transgender people population size estimate. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

116. No Data. Indicator: Percentage of transgender people who are living with HIV. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

117. No Data. Indicator: Percentage of transgender people who received an HIV test in the past 12 months and know their results. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

118. No Data. Indicator: Percentage of transgender people reporting the use of a condom the last time they had sexual intercourse. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

119. 2019. Indicator: Prisoner population size estimate. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

120. 2015. Indicator: Percentage of prisoners who are living with HIV. Source: UNAIDS estimates - <https://aidsinfo.unaids.org>

121. No Data. Indicator: Percentage of prisoner who received an HIV test in the past 12 months and know their results. Source: No known source

122. No Data. Indicator: Percentage of prisoners reporting the use of a condom the last time they had sexual intercourse. Source: No known source
